

6516208262.txt

I am against any attempt to limit the non offensive content what is available to listeners. We have always contended that the airways are the public domain and it is only logical to assume that the service provided by XM radio is fully compliant with this assurrtion. Why would anyone want to restrict the deseminatation of information as important as weather. Please reject petition 04-160.Thank you for your time.
